MEDICAL.

The Latest and Most Improved Discovery of the Mineteenth Century.

No man's name is more intimately connected with the bistory of Materia Medica in the United Status or more favorably known as a pioneer in medical discovery than that of Dr. John Bull. of Louisville, Ry. His inimitable preparation of SARSAPARILLA has long stood at the head of the various compounds of that valuable drug.

His Compound of Wild Cherry has become a household word throughout the West and south.

His Worm Lozenors, in less than a year after their introduction, attained a reputation as wide spread as the continent of North America. But the crowning giory of his life remains to be attained in his Latrier discoverer, or rather combination, for he does not claim to be the discoverer of CED-RON, which is the basis of the BITTERS now offered to the public. That honor belongs to the native inhabitants of CEN-TRAL AMERICA, to whom its virtues have been known for more than two hundred years Armed with it the Indian bids determined to the underse have been known for more than two hundred years Armed with it the Indian bids determined to the underse have been known for more than two hundred years Armed with it the Indian bids determined to the most venomous serpents. It is a belief with them that as long as there is breath in the body the CEDRON is potent to cure, no matter what the disease may be. While DR BUIL is not prepared to endorse this extravagant pretension, he is nevertheless satisfied f om a thorough examination of the evidence relating to its virtues, that as a remedy and preventive for all diseases arising from exposure, either to changes of weather and climate or to the minimal influence, it STANDS WITHOUT A BIVAL, and justly decreves the reputation it has so long enjoyed in Central America and the West Indies.

IN DYSPEPSIA and its attendant train of symptoms, it nets more like a charm than a modicine. There is nothing in the range of Materia Medica that can for a moment bear a comparison with it is this disease.

A full account of this wenderful plant may be found in the No man's name is more intimately connectthe range of Materia Medica that can for a moment bear a comparison with it is this disease.

A SULL account of this wonderful plant may be found in the 11th edition of the U.S. Dispensatory, on pages 1357 and 1388.

A series of experisons in which Dr. BULL has been for years ongaged, has just been brought to a successful termination, and be is now enabled to offer to the public a combination of CEDHON with other approved tonics, the whole preserved in the best quality of corpus prestriant Bourbon Whisky, which he is confident has NO EQUAL IN THE WORLD.

He might furnish a volume of certificates, but the public have long since learned to estimate such things at their true value. The safest plan is for every one to test for himself the virtue of a new medicine.

Give the Cedron Bitters one Trial, And you WILL NEVER use any others. And you will never use any others.

It is not necessary to publish a long list of diseases of which the CEDRON BITTERS are a specific. In all diseases of the STOMACH, BOWELS, LIVER, OR KIDNEYS; IN ALL AFFECTIONS OF THE BRAIN, depending upon derangement of the Stomach and bowels; in GOUT, RHEUMATISM AND NEURALGIA, and in FEVER AND AGUE. It is destined to supersede all others. It not only cures all these diseases but prevents them.

A wineginsful of the Bitters taken an hour before each meal will obviste the had effect of the most unhealthy climate, and screen the person taking it against diseases, under the most trying exposure. Sold Retail by Grocers and Druggists
